DETAILED ACTION

Claim Objections

1. Claim 31 is objected to because of the following informalities: corrections are required in claim 31, which appears to properly depend from claim 20. Appropriate correction is required.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claim 1-19, drawn to a receptacle on a support frame, classified in class 56, subclass 16.6.

II. Claims 20-31, drawn to a lower roll for a conveyor having an axis, a belt, and a moldboard pivotal about the axis of the lower roll, classified in class 198, subclass 570.

3. Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions receptacle (Group I) and moldboard roll & conveyor belt (Group II).

Art Unit: 3671

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
